About

With a strong track record of enhancing projects and excellent collaborative abilities, I aspire to a position as a Full Stack Developer, where I can apply my skills in both frontend and backend development. Currently, I am further honing my skills in databases, recognizing their significance in comprehensive software development. I am eager to continue leveraging my experience and technical competence to make meaningful and standout contributions in this field.

Experience

Frontend Developer
November 2022 - Present

Stämm Biotech
- stamm.bio

- Build, design, develop and maintain user interfaces (UI), web applications, single page applications (SPA) and progressive web applications (PWA), with an intuitive and friendly user experience (UX).
- Implement responsive designs that offer a consistent experience across a variety of devices and browsers.
- Optimize SEO, speed and efficiency of applications.
- Implement effective strategies to manage large volumes of data, optimizing application performance and efficiency.
- Developed and maintained integration with various APIs and REST APIs, ensuring seamless communication between frontend and backend. Also implement advanced communication methods, such as MQTT, WebRTC, and WebSockets, to facilitate real-time data transmission and improve application interactivity.
- Collaborate with members of various teams, in an agile and dynamic way, for the design, development, integration and testing of applications.
- Participate in code reviews to ensure code quality, consistency, and compliance with best practices.
- Deploying applications using Docker + Kubernetes to manage them efficiently and scalably, ensuring consistent and reliable implementation of our solutions, enabling a smooth user experience and optimal performance at all times.
